<http://www.haroldsfonts.com>

Digital application of the international flag code.

Set includes the monochromatic Regular font (seen in black in the foreground above), and separate fonts to render each of the four colors used in the flags (Red, Yellow, Blue, Black).

To use the “color” fonts: In an application that allows layering, set your text in one of the colors. Then make copies of the text and position these other layers directly above the first. Change the fonts and colors appropriately. Bring the black layer to the top for best results. A white background is assumed.

For additional information on the meaning of the flag code
